

Plan for your retirement
now, as of today!

How do you see your retirement?

Maybe you are planning to have a new life of travelling, leisure and activities for which you didn't have enough time while you were working.

You realise that this life will involve cost, but did you know that there is a considerable difference between your legal pension and your current income?

Plan your retirement now to ensure it will be as you imagine it!

The retirement system consists of 3 pillars

- The first pillar is **the legal pension**. This is paid by social security. The Luxembourg state operates its pension scheme on the basis of the pay-as-you-go principle: today's workers pay for today's pensioners.
This system will reach its limits, which is why the state is promoting the development of the second and third pillars.
- The second pillar is the individual **supplementary pension** established by companies for their employees.
- The third pillar consists of the **personal savings** that individuals make to cover their needs.

It's this third pillar that will help you live the retirement you dream of!

Don't wait any longer, discover our **horizon** personal pension solution. Whether you are looking for a balance between growth and security, aiming for performance or seeking a responsible investment, horizon is tailored to your savings objectives.
